Traffic Injuries on Tribal Lands in California

David Ragland, PhD, MPH
Professor Emeritus, School of Public Health
Director, Safe Transportation Research and Education Center (SafeTREC)
University of California, Berkeley

Introduction

It is vital for California’s tribal lands to improve the quality and quantity of data collected about traffic collisions that occur within the boundaries of California’s Rancherias and reservations.

On a practical note, funding for traffic safety improvements is increasingly being awarded based on collision data that documents the extent of the safety problem. Projects where data is required now include roadway upgrades, enforcement efforts, and education programs. However, data documenting collisions on tribal lands is lacking, putting tribal communities at a disadvantage in the competition for safety project funding. It is clearly critical, therefore, to have collision data (counts and descriptions) – including pedestrian and bicyclist collisions – on tribal lands, and it must be as accurate as possible.

Not only will better data help tribal lands compete for funding, it may lead to a better understanding of contributing factors like location, type of collision, and other elements that, if addressed, will help prevent future traffic collisions. MAP-21, the new federal transportation bill, requires “a data-driven, strategic approach to improving highway safety on all public roads.” It also requires “a comprehensive, data-driven, Strategic Highway Safety Plan (SHSP) that defines State safety goals and describes a program of strategies to improve safety.” In order to meet the requirements of MAP-21, comply with the SHSP, and promote safety on tribal lands, data collection and reporting needs to be improved.

As a start toward assembling traffic safety data on tribal areas of California, SafeTREC at the University of California, Berkeley, was asked to conduct an analysis of traffic fatality and injury patterns on tribal area roadways for presentation to the California Tribal Transportation Safety Summit, held November 4-5, 2013, in Sacramento.

Injury Collision Analysis

We used data from the Statewide Integrated Traffic Records System (SWITRS) maintained by the California Highway Patrol (CHP), which is the same source for collision data for the rest of the state. Since the tribal areas of the 111 federally recognized tribes in California are not reported as separate jurisdictions in SWITRS, we used tribal area base maps and counted the collisions that occurred within those coordinates. In a preliminary analysis of 29 California tribal areas, we identified 3,755 fatal and injury collisions that occurred over a period of 10 years from 2002 to 2011 (Tables 1 and 2). While fatal and injury collisions decreased in tribal areas (and in California overall as well), there remain an unacceptable number of such collisions.

ANNOUNCEMENTS

In Memoriam
Matthew C. See Walker
January 26, 1942—January 1, 2014

It is with great sadness that we must announce the loss of our good friend and co-worker Matt See Walker. Matt was part of the United Tribes Technical College family for over 5 years. Matt had the title of Transportation Development Specialist with the Northern Plains Tribal Technical Assistance Program (NPTTAP). This title falls far short in containing a description of what Matt did to make our program successful. It did not matter to Matt what task he was doing if it would benefit others.

The NPTTAP Family had the good fortune to have known and worked with Matt for over 14 years. In those early years Matt was the TERO Director for the Standing Rock Sioux Tribe. In that capacity Matt worked with the NPTTAP to provide training to tribal members in areas such as Heavy Equipment Operation and Stake Reading. These early students now have successful careers because Matt made the efforts needed to hold the training. Matt did everything he could to find the resources to conduct expensive training. Matt never took no for an answer when there was a need that was unmet. Matt’s wisdom and knowledge is going to be greatly missed along with his friendship. Matt will also be missed by the Tribal Technical Assistance Program Family.

The services were held on Saturday at 3pm, January 11, 2014 at the Kingdom Hall of Jehovah Witnesses, Mandan, ND.

We thank Dennis Trusty, Director, Karlita Knight, Technology Specialist, NPTTAP for providing Matt’s memoriam.

---

U.S. Department of Transportation Announces $3 Billion to Strengthen Resiliency of Transit Agencies Affected by Hurricane Sandy
December 23, 2013

The U.S. Department of Transportation today announced the availability of approximately $3 billion to strengthen the resiliency of public transportation systems affected by Hurricane Sandy, which triggered the worst transit disaster in U.S. history just over a year ago. The funds will be awarded by the Federal Transit Administration (FTA) on a competitive basis for projects that protect critical transit infrastructure from being damaged or destroyed by future natural disasters.

The Notice of Funding Availability for Resiliency Projects in Response to Hurricane Sandy and related news release are now available on FTA’s web site.
Data Limitations

SWITRS, maintained by the CHP, processes all reported fatal and injury collisions that occur on California’s state highways and all other public roadways, excluding private property. Anecdotally, data on tribal lands is likely to be under-reported to SWITRS due to discrepancies in jurisdictional authority. CHP responds to a limited number of tribal collisions; consequently, an unknown number are not reported to SWITRS at all. Of those that CHP does respond to, the crashes reported to SWITRS are limited to those that occur on state highways that traverse tribal lands and those in which a crime occurs (e.g. DUI). All other collisions on tribal land are investigated by local tribal agencies and may or may not make it into the SWITRS database. Moreover, individual tribal areas differ in how collisions are investigated and reported. Therefore, our count of 3,755 injury collisions from 2002-2011

is very likely a substantial under-estimate.

Proposal for Improving Traffic Safety Data for Tribal Areas

One of the outcomes of the California Tribal Transportation Safety Summit was a recommendation for improved collection of collision data in tribal areas. The steps for this may include:

i. Survey all tribal areas to determine traffic safety data procedures, include handling of citations and collision reporting;
ii. Develop and implement standardized reporting policies and procedures;
iii. Develop a comprehensive traffic collision database for the 111 federally recognized tribes;
iv. Produce a quarterly report of traffic collisions; and
v. Develop a Tribal Strategic Highway Safety Plan (done in conjunction with the California Strategic Highway Safety Plan [SHSP]) for the combined tribal areas.

We propose forming a Working Group to review and refine these and other steps that could be taken to improve traffic collision data on California’s tribal lands. Please contact Jill Cooper at cooperj@berkeley.edu or 510-643-4259 at SafeTREC if you are interested in participating in this Working Group.

NHTSA Announces Final Rule Requiring Seat Belts on Motorcoaches

The U.S. Department of Transportation’s National Highway Traffic Safety Administration (NHTSA) today issued a final rule requiring lap and shoulder seat belts for each passenger and driver seat on new motorcoaches and other large buses. This new rule enhances the safety of these vehicles by significantly reducing the risk of fatalities and serious injuries in frontal crashes and the risk of occupant ejection in rollovers.

“Safety is our highest priority and we are committed to reducing the number of deaths and injuries on our roadways,” said U.S. Transportation Secretary Anthony Foxx. “Today’s rule is a significant step forward in our efforts to improve motorcoach safety.”

On average, 21 motorcoach and large bus occupants are killed and 7,934 are injured annually in motor vehicle crashes, according to NHTSA data. Requiring seat belts could reduce fatalities by up to 44 percent and reduce the number of moderate to severe injuries by up to 45 percent.

“While travel on motorcoaches is overall a safe form of transportation, when accidents do occur, there is the potential for a greater number of deaths and serious injuries due to the number of occupants and high speeds at which the vehicles are traveling,” said NHTSA Administrator David Strickland. “Adding seat belts to motorcoaches increases safety for all passengers and drivers, especially in the event of a rollover crash.”

“Buckling up is the most effective way to prevent deaths and injuries in all vehicular crashes, including motorcoaches,” said Federal Motor Carrier Safety Administrator Anne S. Ferro. “Requiring seat belts in new models is another strong step we are taking to reach an even higher level of safety for bus passengers.”

The final rule, which amends Federal Motor Vehicle Safety Standard 208, applies to new over-the-road buses and to other types of new buses with a gross vehicle weight rating (GVWR) greater than 11,793 kilograms (26,000 pounds), except transit buses and school buses. This final rule fulfills a mandate from the Moving Ahead for Progress in the 21st Century Act (MAP-21). Beginning in November 2016, newly manufactured buses will be required to be equipped with lap and shoulder belts for each driver and passenger seat.

Several companies have already begun voluntarily purchasing buses that include seat belts and the Department will continue encouraging the industry to speed the adoption of lap and shoulder seat belts prior to the mandatory deadline. In addition, the Department will continue moving forward with other initiatives to improve motorcoach safety as outlined in the Motorcoach Safety Action Plan.

To view the final rule go to: http://www.nhtsa.gov/staticfiles/rulemaking/pdf/Motorcoaches-Belts_FR_11202013.pdf
Can the United States – a sovereign nation – be sued in the tribal court of a sovereign Indian nation?

A road dispute on the Fort Independence Paiute Indian reservation in the Inyo County alpine tundra around Highway 395 has triggered the rare test of sovereignty that’s being watched closely by legal experts across the country.

The Fort Independence Paiute Tribe is on 560 acres in the eastern Sierra Nevada, on what was once the Fort Independence military camp in the 1850s. The Paiutes have filed a $1.8 million suit in their tribal court against PAIKI, a design and engineering firm. The suit alleges that PAIKI is guilty of faulty, unsafe design work on 3.7 miles of roads into and out of the tribe’s travel center and planned casino resort. The suit seeks to recover fees and lost revenue incurred when the Bureau of Indian Affairs shut down the road project in October 2012 because of what it called “massive safety problems.”

PAIKI has turned around and sued the U.S. Department of the Interior and the Bureau of Indian Affairs in a third-party complaint in the tribal court, claiming the BIA’s months-long shutdown of the project was unwarranted and therefore the U.S. government – not PAIKI – should be held liable for all lost revenue and expenses suffered by the tribe.

Matthew Fletcher, director of the Indigenous Law and Policy Center at Michigan State University College of Law, said he’s not aware of any other case in which an agency of the United States government has been sued in tribal court. “It’s a very interesting, very important case,” he said. “I’m pretty sure the U.S. Department of Justice is going to fight this vigorously. My sense is Congress hasn’t waived the federal government’s sovereign immunity in tribal court for any reason.”

The Fort Independence case will test “the broader question of the authority of tribal courts to entertain claims against the U.S. government,” said UCLA Law School Vice Chancellor Carole Goldberg, who has set up tribal courts and teaches federal Indian law. Goldberg said this is the first such case she’s aware of “involving money.”

The U.S. Department of Justice, represented by the U.S. attorney’s office in Sacramento, said it has until January to answer the complaint. In the Eastern District of California, encompassing 43 federally recognized tribes – most of them small – the federal government has not had to defend itself against claims in tribal court, said Sylvia Quast, chief of the Defense Litigation Unit.

Should the tribal court judge, based in Sacramento, rule against the bureau, the federal government may claim sovereign immunity. Experts said the tribe would then likely have to seek redress in federal court.

The case involves a portion of the millions of dollars in Federal Highway Administration funds from gasoline taxes earmarked for repairs on roads in Indian country. If left unrepaired, these rough, remote roads can cause fatal crashes and make it difficult for tribal members to escape wildfires, according to the BIA.

The BIA’s Pacific Region, which has jurisdiction over approximately 630 miles of roads serving California’s 105 federal recognized tribes, has only enough money to keep 18 percent of the roads and bridges in California Indian country “in acceptable condition,” said Dale Risling, deputy regional director of Indian services. The lack of funds “leaves many of our roads in unsafe condition,” Risling said.

Ever since the Gold Rush era, the federal government has promised to build and maintain roads in Indian country in exchange for millions of acres of land, “and they never did,” Goldberg said. The Fort Independence case is “a big deal because the federal government owns the (reservation) land in trust for the tribes, so maintaining roads has been an important part of the service the BIA provides as a trustee.”

This year, the BIA has allocated $21.9 million to repair roads in California Indian country, said regional road
engineer Steve Wilkie. Nationwide, $450 million is earmarked for 564 federal recognized tribes based on a complicated mathematical formula taking into account size of tribes and road traffic, Wilkie said. “We are conducting a safety audit of all reservations in the state ... we’ve argued for a long time the formula is inherently unfair because we have small, isolated tribes that don’t have the physical attributes to compete well.”

Fort Independence consists of 150 members, about 90 of whom live on the reservation, said the tribe’s Sacramento-based attorney, Jack Duran. The tribe currently has a travel center with a gas station and 80 slot machines and plans to expand, Duran said. The tribe has sued PAIKI for cost overruns and other alleged design flaws that the tribe says didn’t provide a safe entrance and exit. Duran said. “It’s a very large public safety issue because this concerned the ingress and egress to the tribe’s reservation off a main highway,” Duran said. “It’s kind of like Death Valley, and is susceptible to scrub brush fires.”

PAIKI’s complaint alleges that the BIA, acting as the tribe’s administrator over the road design and construction, shut down the new intersection “without a reasonable or good faith basis.” The company is asking for legal fees and alleges that the BIA “contributed, in whole or in part, to the injuries and damages allegedly sustained” by the Fort Independence Tribe.

Should the BIA be held partly liable, it could open the door for similar lawsuits in tribal court filed by other California tribes doing road work under the aegis of the BIA.

Federal Highway Administration Tribal Transportation Program Safety Fund (TTPSF) 2013 Grant Recipients

In November U.S. Transportation Secretary Anthony Foxx announced that 183 tribes will receive $8.6 million for 195 projects from the Federal Highway Administration’s Tribal Transportation Program Safety Fund (TTPSF) to improve transportation safety on tribal lands. Below are the California and Nevada tribes receiving funds. Below are the California and Nevada recipients.

NHTSA Administrator David L. Strickland Resigns
Washington Post, By Ashley Halsey III,

The leadership shuffle at the U.S. Department of Transportation continued with the resignation of the top safety official, David L. Strickland.

U.S. Transportation Secretary Anthony Foxx also accepted the resignation of his chief deputy, John Porcari, a former Maryland transportation secretary who spent more than four years in the federal role.

Strickland has headed the National Highway Traffic Safety Administration for four years, as a key player in then-Transportation Secretary Ray LaHood’s safety-first initiatives against distracted driving, drunk driving and roadway safety.

Foxx moved quickly to replace Porcari, reassigning Federal Highway Administrator Victor Mendez to take over as acting deputy secretary.

Finding someone whose credentials rival Strickland’s will be a challenge. Strickland is a Harvard-educated lawyer who came to the job after eight years as counsel to the Senate committee that oversaw NHTSA.

David Friedman, NHTSA’s deputy administrator, will serve as acting NHTSA administrator.

During Strickland’s tenure, the federal agency finalized guidance to states on “driverless” cars, provided automakers contemplating new electronic features with guidelines on distracted driving and handled investigations into issues with Jeep SUVs, Chevrolet Volt and the Tesla Motors Model S.

The department of transportation confirmed his resignation. There was no immediate comment from Strickland on his departure or future plans.

The Office of Federal Lands Highway (FLH) provides program stewardship and transportation engineering services for planning, design, construction, and rehabilitation of the highways and bridges that provide access to and through federally owned lands.

The primary purpose of the FLHP is to provide financial resources and technical assistance for a coordinated program of public roads that service the transportation needs of Federal and Indian lands.

Federal Transit Administration (FTA) is one of 10 modal administrations within the U.S. Department of Transportation. Headed by an Administrator who is appointed by the President of the United States, FTA administers federal funding to support a variety of locally planned, constructed, and operated public transportation systems throughout the U.S., including buses, subways, light rail, commuter rail, streetcars, monorail, passenger ferry boats, inclined railways, and people movers.

Rural Transit Assistance Program (RTAP)
The mission is to address the needs of rural, small urban and tribal transit operators across the nation.

Bureau Of Indian Affairs
There are millions of acres of land held in trust by the United States for American Indians, Indian tribes, and Alaska Natives. There are 566 federal recognized tribal governments in the United States. Developing forestlands, leasing assets on these lands, directing agricultural programs, protecting water and land rights, developing and maintaining infrastructure and economic development are all part of the agency's responsibility. In addition, the Bureau of Indian Affairs provides education services to approximately 48,000 Indian students.

WEBSITE APPLICATIONS—APPS

Heat Safety Tool App
U.S. Department of Labor (DOL), Occupational Safety and Health Administration (OSHA)
The App allows workers and supervisors to calculate the heat index for their worksite.
To download the app go to: https://www.osha.gov/SLTC/heatillness/heat_index/heat_app.html

Transportation Construction Advocate App
American Road & Transportation Builders Association (ARTBA)
Available for both Android and Apple devices.
To download the app go to: Google Play or iTunes.

Asphalt Calculator+ App
This iPhone/iPod Touch app will calculate the amount of cubic yards needed for a given job. It will also calculate hot mix tonnage. Polyclef Software.
To download the app go to: Google Play or iTunes.

TRANSPORTATION PROGRAMS AND DEVELOPMENT

FHWA Resource Center
The Mission to advance transportation technologies and solutions through training, technical assistance, technology deployment, and partnerships.
For more information go to: http://www.fhwa.dot.gov/resourcecenter/

The FHWA has developed an extensive list of resources that focus specifically on the latest culvert technology. To view this list go to: http://www.scribd.com/doc/63745094/Culvert-Technologies-List

Pavement Construction and Safety Training on Demand
New free Web-based courses sponsored by the Federal Highway Administration (FHWA)
To view the courses go: http://www.fhwa.dot.gov/publications/focus/13jul/13jul02.cfm

National Highway Institute (NHI)
NHI Training In Action 2013-Magazine
Improving the Performance of Transportation Through Training.
To View the magazine go to: http://www.nhi.fhwa.dot.gov/downloads/other/training_in_action_2013.pdf

National Highway Institute (NHI)
The NHI in partnership with the Transportation Curriculum Development Council has developed a number of FREE web-based trainings that can be completed in one, two, or three hours. Whether you are working in the field, have limited time for training, or just want to expand your skill set on a specific topic these web-based courses provide an ideal way to enhance your knowledge on key areas.
• NEW 2013-Introduction to NEPA and Transportation Decision-making (WBT) course 142052
• NEW 2013-Outdoor Advertising Control: Non-Bonus States (WBT) course 141049
• NEW 2013-Outdoor Advertising Control: Bonus States (WBT) course 141048
• NEW 2013- Geotechnical Aspects of Pavements Course 132040
• NEW 2013-Principles of Evacuation Planning Tutorial Course 133107
• NEW 2013-Geotechnical Aspects of Pavements Course 132040
• NEW 2013-TCCC Earthworks Series: Excavation Course 132092
• NEW 2013-TCCC Earthworks Series: Fill Placement Course 132093
To view the entire list of available courses go to: http://www.nhi.fhwa.dot.gov/default.aspx

National Transportation Training Resource (NTTR)
The National Transportation Training Resource (NTTR) is an online database of information about learning resources for the public-sector transportation workforce. The NTTR is a tool for training managers and frontline transportation professionals.
To visit the website go to: http://www.nttr.dot.gov/
FHWA Wildlife Vehicle Collision Reduction Study Training Course
A national study was conducted on the causes and impacts of wildlife vehicle collisions (WVCs). This study also provides recommendations and solutions for reducing these collisions.
To view the course go to: www.environment.fhwa.dot.gov/WVCtraining/index.asp

National Cooperative Highway Research Program (NCHRP) Report 667
Model Curriculum for Highway Safety Core Competencies presents course materials, including the instructor’s guide and student workbook, for a fundamental highway safety training course. The course is designed to address the core competencies highway safety practitioners should have or acquire. An accompanying CD-ROM includes a brochure and short Microsoft PowerPoint presentation for marketing the training course.
To view the report go to: http://onlinepubs.trb.org/onlinepubs/nchrp/nchrp_rpt_667.pdf

Paul S. Sarbanes Transit in Parks Technical Assistance Center (TRIPTAC)
The TRIPTAC is available to all Federal Land Management Agencies (FLMAs), not only those applying for or receiving funds from the Transit in Parks program. State, local or tribal governments who are working in collaboration with an FLMa to expand public lands access are also welcome to use TRIPTAC services to obtain alternative transportation information and assistance.
To view available training courses go to: http://www.triptac.org/

Sign Retro Management Selection Tool helps you estimate how much it will cost your organization to implement different Federal Highway Administration sign retroreflectivity maintenance methods using your organization’s specific costs and implementation scenarios.
To register for the tool go to: http://ctt.mtu.edu/ToolRegistration.html

U.S. Small Business Administration (SBA)
Online Courses for Starting Your Business
Several free online courses are offered by the SBA to help prospective and existing entrepreneurs understand the basics about writing a business plan.
For more information go to: http://www.sba.gov/content/online-courses-starting-your-business

Community Transportation Association of America (CTAA)
Passenger Service and Safety PASS Basic Training Program
The PASS Basic program consists of 6 modules and includes comprehensive training on the assistance that drivers should be providing to passengers with special need.
For more information go to: http://training.ctaa.org/

Community Transportation Safety and Security Accreditation (CTSSA)
The program is designed to promote the safety and security of the customers of community and public transportation systems and also to promote the safety and security of the women and men who deliver these services and provide mobility for the riding public every day.
For more information go to: http://web1.ctaa.org/webmodules/webarticles/anmviewer.asp?a=32&z=36

Minnesota Local Technical Assistance Program (LTAP)
Gravel Road Maintenance and Design (Online)
This course helps supervisory personnel and operators better understand the materials, techniques, and equipment needed for maintaining gravel roads.
To enroll in the course go to: http://www.mnltap.umn.edu/training/topic/maintenance/gravel/online.html

Curbing Transit Employee Distracted Driving
The 30-minute course, was developed by FTA in conjunction with the Florida Department of Transportation It’s an excellent tool to educate, inform, and increase awareness among all transit workers about the dangers and challenges associated with distracted driving.
For more information go to: http://www.fta.dot.gov/newsroom/12910_14467.html

Work-Zone Safety Tutorial
Minnesota LTAP has launched a new online free tutorial that offers a convenient opportunity for new, seasonal, or temporary staff to learn about the fundamentals of work-zone safety and the basic concepts of the work-zone area before arriving at the job site.
There is no cost to take the tutorial, and registration is not required.
To view the tutorial go to:
http://www.mnltap.umn.edu/training/web/workzone/

VIDEOS AND DVDS

Environmental Justice in Transportation for California Tribes Video Workbook
Produced by the National Indian Justice Center.
Available at: 707-579-5507 or,
http://nijc.org/publications.html

Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users.
The Forest Service, Bureau of Land Management and Federal Highway Administration have jointly developed training videos to show how the various programs authorized within SAFETEA-LU can benefit public lands and their neighboring communities.
The training video can be found at: http://www.fs.fed.us/eng/safetea-lu

FHWA LTAP/TTAP Clearinghouse
Operators Pre-Start Motor Grading Inspection
Promotes motor grader safety and productivity for county and city road agencies.

Roadway Safety + Training Program Version 9 Is a standard method of providing worker awareness training for road workers. The RSP+ download includes interactive Macromedia modules, Trainee Booklets, Toolbox Pamphlets, printable screen guides, and an Instructor Manual. Most are provided in 3 languages.
Download program from www.workzonesafety.org
To obtain copies of the videos contact Sarah Crane at 202-289-4434, or e-mail scrane@artba.org

FHWA Office of Safety Design
Two informational videos on DVD.
FHWA-SA-08-007. Median Barriers—A Solution to Cross-Median crashes.
FHWA-SA-07-024. The previously released video, Rumble Strips—A Sound Investment.
Order from FHWA Report Center – publication number Report.center@fhwa.dot.gov.

FHWA Office of Safety
2009 Road Safety Audit (RSA) Video
FHWA has created a new video on Road Safety Audits (RSAs). The new RSA video focuses on the benefits of using a multidisciplinary approach to improve safety. For more information or to view the video go to:
TRIBAL TRANSPORTATION RESOURCES

FHWA office of Safety
Modern Roundabouts: A Safer Choice (FHWA-SA-10-023)
The video explains the many benefits of roundabout intersections and is intended primarily for decision makers in state and local transportation agencies to overcome the common barriers and reasons for not considering roundabouts as intersection alternatives. It is presented in a non-technical manner and can be used at public meetings for proposed roundabout projects.
For more information go to: http://safety.fhwa.dot.gov/intersection/roundabouts/

FHWA Research and Technology
Long-Term Pavement Performance (LTPP) Program
The Long-Term Pavement Performance (LTPP) program makes the world’s largest pavement performance database available annually to the public in Microsoft Access® format and available on thumb drive or DVD-ROM. The Standard Data Release (SDR) may be obtained through LTPP Customer Support Services at: Email: ltppinfo@dot.gov
For more information go to: http://www.fhwa.dot.gov/research/tfhrc/programs/infrastructure/pavements/ltpp/getdata.cfm

Sign Retroreflectivity Informational Presentations
The Center for Technology & Training at the Michigan Tech Transportation Institute has developed a web based informational presentation designed to help local agencies begin the discussion of sign retroreflectivity with decision-makers.
To download the videos go to: http://ctt.mtu.edu/SignRetroPresentations.html

Zero Fatalities Utah DOT
Reggie P. Shaw Video
His vehicle drifted across the highway centerline and side-swiped an oncoming vehicle on Sept. 22, 2006. The officers investigated and found out that Shaw was text messaging during the time of his accident.

Tribal School Zone Safety: Video and Toolkit
To obtain a free DVD, Please contact:
Chimai Ngo, 202-366-1231

Roadway Safety Foundation
New Run-Off-Road/Rumble Strip Brochure and Recognize-React-Recover DVD
To obtain free copies of the brochure and DVD go to: http://www.roadwaysafety.org/run-off-road-dvd-2/

Road Safety Audit (RSA) Software
Is intended to be a guiding and process tracking tool enabling the use of RSA prompt lists at variety of detail levels, while providing a way to accompany each safety issue raised with a discussion and assessment
To download the software go to: http://safety.fhwa.dot.gov/rsa/software/

Rumble on the Reservation
This 11-minute DVD highlights rumble strips as a cost-effective crash countermeasure that American Indian communities can incorporate into roadway safety projects on tribal lands.
Roadway Safety Foundation
Please contact us at 202-857-1228 or info@roadwaysafety.org to order free copies

Dine Biitah: “Among the People”, Scenic Byway
Threads its way through over a hundred miles of Navajo land, people, culture and natural beauty.

Ordering Information
Printed copies of our in-house publications are available on a first-come, first-served basis. Priority is given to Tribal Transportation Personnel. PDF versions of most of our publications are available on our website: http://www.nijc.org/ttap_resources.html

All our videos, publications and CD-ROMs in our lending library are loaned for a four-week period. Two titles may be borrowed at a time.

To order or borrow materials, please send a request to: barry@nijc.org or, nijc@aol.com or Fax a request to: 707-579-9019.

To view past issues of publications, videos and development programs, please visit our website library at: http://nijc.org/datasheets/ttp/TTAP_Resourceslist.asp
TRIBAL TRANSPORTATION FUNDING RESOURCES

ANNOUNCEMENT

Warm-Mix Asphalt Wins NOVA Award for Innovation

The National Asphalt Pavement Association (NAPA) has received the prestigious 2013 NOVA Award from the Construction Innovation Forum (CIF) for its work to speed the deployment and uptake of warm-mix asphalt.

“The National Asphalt Pavement Association (NAPA) has received the prestigious 2013 NOVA Award from the Construction Innovation Forum (CIF) for its work to speed the deployment and uptake of warm-mix asphalt.

“NAPA is proud to accept this award on behalf of the asphalt pavemen industry, warm-mix technology developers, and our partners at the Federal Highway Administration (FHWA) and state departments of transportation nationwide. The success of warm mix is due to cooperation and a willingness to innovate from road owners and builders alike,” said NAPA President Mike Acott.

Warm-mix asphalt encompasses a range of technologies used to reduce the production and placement temperature of asphalt pavement mixtures. A variety of environmental, worker safety, and construction benefits have been realized through the adoption of warm-mix asphalt.

Warm-mix asphalt was introduced to the United States from Europe in 2004. Since that time, the U.S. has become the leading adopter and proponent of the technology. Last year, about a quarter of all U.S. asphalt mix tonnage was produced as warm mix.

“In 2010, FHWA named warm-mix asphalt as an Every Day Counts initiative because it was a proven technology with environmental and construction benefits,” said Acott. “Three years later, most states have specifications for warm mix and its use continues to grow.”

The CIF NOVA Award recognizes and advances significant innovation in all areas of the construction industry around the world. Winners are selected by a jury of internationally recognized experts following a comprehensive investigation process. To date, more than 700 nominations for the NOVA Award have been received from more than 20 countries. Worldwide, 98 innovations from 14 countries have received the coveted award.

In selecting warm mix to win a 2013 NOVA Award, the investigators cited its ability to improve compaction, reduce fuel or energy use, improve worker comfort, lengthen the paving season, and reduce overall paving costs.

The 2013 winners were announced Nov. 12 at the annual Construction Users Roundtable (CURT) National Conference in Tucson, Ariz. The award was accepted by NAPA Director of Engineering Kent Hansen, P.E., and Matthew Corrigan, Program Manager at the FHWA Office of Pavement Technology.

NOTE: many of the listed transportation programs are dependant on the implementation of MAP-21.

CALIFORNIA DEPARTMENT OF TRANSPORTATION (CALTRANS)

The State-Legislated Safe Routes to School Program

July 6, 2012, MAP-21, the Moving Ahead for Progress in the 21st Century Act was signed into law. Under MAP-21, SRTS was consolidated into the Transportation Alternatives Program (TAP), but is eligible for Surface Transportation Program (STP) and Highway Safety Improvement Program (HSIP) funds.

On April 29, 2013, Caltrans Division of Local Assistance announced Cycle 6 Call for Projects for the Highway Safety Improvement Program (HSIP). This Call for Projects is targeted for approximately $150 million of federal HSIP funds based on the estimated programming capacity in the 2013 FSTIP. Cycle 6 is now closed.

- Local Enforcement Agency Grants
- Illegal Disposal Site Abatement Grant Program—February 4, 2014.
- Waste Tire Cleanup grants for FY 2014/15 deadline February 27, 2014.
- Rubberized Pavement (TRP) Grant Program—FY 2014/15 solicitation are tentatively scheduled to be available in Spring 2014.
- Tire-Derived Aggregate (TDA) Grant Program—FY 2013/14 due January 22, 2014
- Tire-Derived Product Grant Program—FY 2014/15 solicitation are tentatively scheduled to be available In Spring 2014
- Used Oil Recycling Grants

Additional grant information and list of active grants can be found at:

http://www.calrecycle.ca.gov/Grants/default.htm

Highway Safety Improvement Program (HSIP)
It is never too early for local agencies to analyze their roadway network to 1) identify their highest crash locations and corridors, 2) consider effective and efficient countermeasures to improve the safety of these locations/corridors, and 3) identify projects that have the highest Benefit-to-Cost ratios.
Caltrans Cycle 7 to be determined.

FEDERAL

U.S. DEPARTMENT OF TRANSPORTATION

Transportation Alternatives Program (TAP)
- Safe Routes to School Program.
- National Scenic Byways

The Moving Ahead for Progress in the 21st Century Act (MAP-21) authorized the Transportation Alternatives Program (TAP) to provide funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, community improvement activities, and environmental mitigation; recreational trail projects; safe routes to school projects; and projects for planning, designing, or constructing boulevards and other roadways largely in the right-of-way of former divided highways. The TAP replaced the funding from pre-MAP-21 programs including the Transportation Enhancement Activities, Recreational Trails Program, For more information go to:

http://www.fhwa.dot.gov/environment/transportation_alternatives/

National Center for Safe Routes to School
Several potential sources of Safe Routes to School funding exist, and most programs benefit from combining a variety of these sources.

Federal Transit Administration

Public Transportation On Indian Reservations (FTA 5311)
Federally recognize tribes may use the funding for capital, operating, planning, and administrative expenses for public transit projects that meet the growing needs of rural tribal communities. Examples of eligible activities include: capital projects; operating costs of equipment and facilities for use in public transportation; and the acquisition of public transportation services, including service agreements with private providers of public transportation services.

FHWA

Dwight David Eisenhower Transportation Fellowship Program
Eisenhower Tribal Colleges and Universities Fellowship Provides Students in those schools with opportunities to pursue careers in Transportation. This fellowship also serves as a feeder for other Eisenhower Fellowships. Currently funded at $2.2M annually. For more information go to http://www.fhwa.dot.gov/tpp/ugp.htm

U.S. Department of Agriculture
USDA Rural Community Development Initiative (RCDI) Funding Opportunity No.: USDA-RD--HCFP-RCDI-2013 The mission is to increase economic opportunity and improve the quality of life for rural residents. Rural Development fosters growth in homeownership, finances business development, and supports the creation of critical community and technology infrastructure. FY 2013 is closed. For grant information go to: http://www07.grants.gov/search-grants.html?agencies%3DUSDA|Department%20of%20Agriculture
Further information on rural programs is available at a local USDA Rural Development web site: http://www.rurdev.usda.gov/BCP_rbeg.html

Environmental Protection Agency
Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program provides funding for eligible applicants for projects that address local environmental and public health issues within an affected community. The CPS Program is designed to help communities understand and address exposure to multiple environmental harms and risks.

Request for Proposals
The total estimated available funding for awards under this competitive opportunity is $1,200,000. EPA anticipates awarding one cooperative agreement per EPA region in amounts of up to $120,000 per award for two years.

Pre-Application Assistance
Interested persons may access the pre-application assistance calls by dialing 1-866-299-3188 and entering the code 202-564-1771 when prompted. The following are the conference call dates and times.

Wednesday, January 15, 2014 (en Español) 4:00 - 5:30 p.m.
Saturday, January 25, 2014 1:00 - 2:30 p.m.
Wednesday, February 5, 2014 5:00 - 6:30 p.m
For more information go to:
http://www.epa.gov/environmentaljustice/grants/ej-cps-grants.html

Department of Housing and Urban Development (HUD) Indian Housing Block Grant Program (IHBG) Funds appropriated by Congress for the Indian Housing Block Grant Program (IHBG) are made available to eligible grant recipients through a formula. Regulations governing the formula can be found at 24 CFR Part 1000, Subpart D. On April 20, 2007, the Native American Housing Assistance and Self Determination Final Rule was published revising the IHBG Formula. In brief, the formula has two components; Need and Formula Current Assisted Stock. The Need component considers population, income, and housing conditions. The Formula Current Assisted Stock component reflects housing developed under the United States Housing Act (the predecessor of the IHBG program) which is owned and/or operated by the IHBG recipient and provides funds for ongoing operation of the housing.
An Indian tribe may challenge the Need portion of the IHBG formula provided the data are gathered, evaluated, and presented in a manner that is fair and equitable for all participating tribes. Tribes have until March 30 of each year to submit challenges to their Needs data in consideration for the upcoming fiscal year. For more information go to:
NIJC SERVICES

The National Indian Justice Center (NIJC) provides a range of services, including regional and local training sessions under contracts with tribes, court evaluation and court planning services, and other resource services.
